Are you being **fully reimbursed** for every radiology exam?

Are your patients always **properly prepped** for exam prerequisites?

Are your physicians ordering **every exam correctly** every time?

iOrder touches the critical aspects of your revenue cycle including proper coding to help you maximize reimbursements and speed patient throughput. Positively impact your healthcare enterprise by **linking all orders** from all sources into a single, transparent communication conduit.

iOrder makes the American College of Radiology's Appropriateness Criteria available to your physicians so that the most appropriate order is requested the first time.

The screenshot shows a web browser window with the URL 'https://iordermedical.com'. The page title is 'Medical Order Assistance and Appropriateness'. The user is logged in as 'Admin'. The procedure being reviewed is 'Procedure: BRAIN-without & with IV contrast'. The checklist items are:

- 1. Does the patient weigh more than 500 lbs? (Yes, No, Unknown) - Status: Green checkmark.
- 2. Does the patient have a history of allergic reaction to IV contrast? (Yes, No, Unknown) - Status: Green checkmark.
- 3. Any patient history of the following/serum creatinine suggested? (ACE manual on contrast media, version 7,2010) - Status: Yellow warning icon. A yellow banner below reads: 'Serum Creatine required. Suggested serum creatine is less than 1.5mg/dl'. The list of conditions includes: 'kidney disease' as an adult, including tumor or transplant; kidney failure; diabetes treated with medication; collagen vascular disease; presently takes metformin or any metformin containing medication; paraneoplasia disease (example: multiple myeloma); regularly takes nonsteroidal anti-inflammatory drugs; regularly takes nephrotoxic antibiotics (example: aminoglycosides); NONE OF THE ABOVE.
- 4. Could patient be pregnant (12-55 years old)? (Yes, No, Unknown) - Status: Red minus icon. A red banner below reads: 'A pregnancy test is required prior to scheduling the exam.' Below this is the question 'Has serum pregnancy test been ordered?' (Yes, No, Unknown).
- 5. Does the patient have any history of multiple allergies or asthma? (Yes, No, Unknown)
- 6. Does the patient have a history of cancer? (Yes, No, Unknown)

iOrder Minimizes:

- Inappropriate exam orders
- Exam Stoppages due to "red flags" and misinformation
- Modalities sitting fallow due to canceled exams

iOrder Maximizes:

- Reimbursements
- Quality Care
- Patient Satisfaction
- Referring Physician Satisfaction

Grow your hospital's business through more satisfied physician referrals and greater profitability in your radiology department.

iOrder clients are already **saving between 5-10 minutes per order** as their enterprise realizes an **additional 2%-4% in revenue** from the experience of the streamlined and transparent communication conduit that only iOrder provides.
